## How Best To Support Me

Be honest and open with me

Remember that any concern is a "red flag" to me

If it's an important issue I need others to feel supported to say "Andy this is an issue that we need to discuss now"

Give me time for consideration of all the options when making important decisions

Know that I will ask lots of questions, the more information I have the better placed I will be to provide effective support

Recognise that I will routinely be engaged in work related tasks outside usual office hours - this is the way I am

Providing good support matters to me - dedication to the people we support is very important to me

That I need to drink tea on a regular basis
